Elliott profiles roots, rhizomes, corms, and tubers that grow in the fields, forests, and marshlands of North America. Some of the plants he presents are edible, while others can be brewed into robust teas; some are effective as medicines, and others can be used to make natural toothpaste, shampoo, and dyes.

Plant Processing Of Natural Gas - saltalf.hoofhealth.ca
Elliott has worked on hydrothermal technology for nearly 40 years, applying it to a variety of substances, including wood chips and other substances. Because of the mix of earthy materials in his laboratory, and the constant chemical processing, he jokes that his laboratory sometimes smells "like a mix of dirty socks, rotten eggs and wood smoke" — an accurate assessment.
