Wall-E meets Hatchet in this New York Times bestselling illustrated middle grade novel from Caldecott Honor winner Peter Brown Can a robot survive in the wilderness? When robot Roz opens her eyes for the first time, she discovers that she is all alone on a remote, wild island. She has no idea how she got there or what her purpose is—but she knows she needs to survive. After battling a violent storm and escaping a vicious bear attack, she realizes that her only hope for survival is to adapt to her surroundings and learn from the island’s unwelcoming animal inhabitants. As Roz slowly befriends the animals, the island starts to feel like home—until, one day, the robot’s mysterious past comes back to haunt her. From bestselling and award-winning author and illustrator Peter Brown comes a heartwarming and action-packed novel about what happens when nature and technology collide.

In a future where the Population Police enforce the law limiting a family to only two children, Luke, an illegal third child, has lived all his twelve years in isolation and fear on his family’s farm in this start to the Shadow Children series from Margaret Peterson Haddix. Luke has never been to school. He’s never had a birthday party, or gone to a friend’s house for an overnight. In fact, Luke has never had a friend. Luke is one of the shadow children, a third child forbidden by the Population Police. He’s lived his entire life in hiding, and now, with a new housing development replacing the woods next to his family’s farm, he is no longer even allowed to go outside. Then, one day Luke sees a girl’s face in the window of a house where he knows two other children already live. Finally, he’s met a shadow child like himself. Jen is willing to risk everything to come out of the shadows—does Luke dare to become involved in her dangerous plan? Can he afford not to?

Preparation for the Next-Generation MCAS Tests for 2016-2017! This extensive skill-building quiz book contains over 200 pages of quizzes targeting over 50 mathematics skills! Each quiz focuses on one specific skill, with questions progressing from simple to more complex. Students will develop a thorough understanding of each skill, while also gaining experience with all the types of tasks found on the new Next-Gen MCAS tests. Divided into Convenient Topics - Covers every skill listed in the Massachusetts Curriculum Frameworks - Includes sections for operations and algebraic thinking, number and operations, fractions, measurement, data, and geometry - Each section contains a focused quiz for each individual skill - Each quiz includes a range of question types and increasing rigor to develop a thorough understanding of the skill - Targeted format allows test preparation to be easily integrated into student learning Prepares Students for the Next-Generation MCAS Assessments - Covers all the skills assessed on the Next-Gen MCAS mathematics tests - Provides practice completing all the question types found on the test - Includes multiple choice, multiple select, short answer, technology enhanced, and open response question types - Prepares students for questions that involve explain their thinking, justifying answers, or describing mathematical concepts - More rigorous questions prepare students for the higher difficulty of the new assessments - Guided tasks teach students what is expected in answers Key Benefits - Develops a thorough understanding by focusing on one skill at a time - Reduces test anxiety by allowing ongoing test practice - Individual quizzes allow gaps in knowledge to be targeted - Ensures students are comfortable with a range of question formats - Prepares students for all the question types found on the MCAS tests - Provides revision and test practice as the student learns

Musician John Kovac uses PVC pipes to make his own instruments.

Emma Gatewood was the first woman to hike the entire Appalachian Trail alone, as well as the first person—man or woman—to walk it twice and three times and she did it all after the age of 65. This is the first and only biography of Grandma Gatewood, as the reporters called her, who became a hiking celebrity in the 1950s and '60s. She appeared on TV with Groucho Marx and Art Linkletter, and on the pages of Sports Illustrated. The public attention she brought to the little-known footpath was unprecedented. Her vocal criticism of the lousy, difficult stretches led to bolstered maintenance, and very likely saved the trail from extinction. Author Ben Montgomery was given unprecedented access to Gatewood’s own diaries, trail journals, and correspondence. He also unearthed historic newspaper and magazine articles and interviewed surviving family members and hikers Gatewood met along the trail. The inspiring story of Emma Gatewood illustrates the full power of human spirit and determination.

"We had seen God in His splendours, heard the text that Nature renders. We had reached the naked soul of man." In 1914, Ernest Shackleton set out on an 1,800-mile trek across Antarctica. During the three-year expedition, his team overcame shipwreck, treacherous glaciers, and a bitterly hostile climate. They faced the elements on this icy continent with extraordinary determination, resourcefulness, and courage. This account by one of Britain’s greatest explorers is at once thrilling, harrowing, and inspiring.

“This eloquent, elegant book thoughtfully plumbs the . . . consequences of our dependence on plastics” (The Boston Globe, A Best Nonfiction Book of 2011). From pacemakers to disposable bags, plastic built the modern world. But a century into our love affair, we’re starting to realize it’s not such a healthy relationship. As journalist Susan Freinkel points out in this eye-opening book, we’re at a crisis point. Plastics draw on dwindling fossil fuels, leach harmful chemicals, litter landscapes, and destroy marine life. We’re drowning in the stuff, and we need to start making some hard choices. Freinkel tells her story through eight familiar plastic objects: a comb, a chair, a Frisbee, an IV bag, a disposable lighter, a grocery bag, a soda bottle, and a credit card. With a blend of lively anecdotes and analysis, she sifts through scientific studies and economic data, reporting from China and across the United States to assess the real impact of plastic on our lives. Her conclusion is severe, but not without hope. Plastic points the way toward a new creative partnership with the material we love, hate, and can’t seem to live without. “When you write about something so ubiquitous as plastic, you must be prepared to write in several modes, and Freinkel rises to this task. . . . She manages to render the most dull chemical reaction into vigorous, breathless sentences.” —SF Gate “Freinkel’s smart, well-written analysis of this love-hate relationship is likely to make plastic lovers take pause, plastic haters reluctantly realize its value, and all of us understand the importance of individual action, political will, and technological innovation in weaning us off our addiction to synthetics.” —Publishers Weekly “A compulsively interesting story. Buy it (with cash).” —Bill McKibben, author of The End of Nature “What a great read—rigorous, smart, inspiring, and as seductive as plastic itself.” —Karim Rashid, designer

Prepare for the MCAS Grade 7 Math test with a perfect practice book! The surest way to practice your MCAS Math test-taking skills is with simulated exams. This comprehensive practice book with 6 full length and realistic MCAS Math practice tests help you measure your exam readiness, find your weak areas, and succeed on the MCAS Math test. The detailed answers and explanations for each MCAS Math question help you master every aspect of the MCAS Math. 6 Full-length MCAS Grade 7 Math Practice Tests is a prestigious resource to help you succeed on the MCAS Math test. This perfect practice book features: Content 100% aligned with the MCAS test Six full-length MCAS Math practice tests similar to the actual test in length, format, question types, and degree of difficulty Detailed answers and explanations for the MCAS Math practice questions Written by MCAS Math top instructors and experts After completing this hands-on exercise book, you will gain confidence, strong foundation, and adequate practice to succeed on the MCAS Math test. State Assessment Policy and Practice for English Language Learners presents three significant studies, each examining a different aspect of states’ strategies for including English language learners in state assessments. \*an Analysis of State Assessment Policies Regarding Accommodations for English Language Learners; \*a Survey and Description of Test Translation Practices; and \*an Examination of State Practices for Reporting Participation and Performance of English Language Learners in State Assessments. With the rise in population of English language learners and the subsequent stepped-up legislative focus on this student population over the past decade, states have been challenged to include English language learners in state assessment programs. Until now, the little data available on states’ policies and practices for meeting this challenge has been embedded in various reports and professional journals and scattered across the Internet. This volume offers, for the first time, a focused examination of states’ assessment policies and practices regarding English language learners. The three studies were supported by OELA, the U.S. Department of Education’s Office of English Language Acquisition, Language Enhancement, and Academic Achievement for Limited English Proficient Students. State Assessment Policy and Practice for English Language Learners is of interest to researchers and professionals involved with the assessment of English language learners; state- and district-level policy makers; and academics, teacher educators, and graduate students in a number of fields, including educational and psychological assessment, testing and measurement, bilingual education, English as a second language, and second language acquisition.

Everyone has a talent, right? Hayley is sure she has one, but she's having trouble pinpointing it. Then Hayley buys a ukulele at a yard sale. Learning to play takes practice, but it's fun, fun, fun. Before long Hayley is strumming up a storm, and her classmates want in on the action. Then terrible new threatens not only the new uke band, but the whole school music program. Now it's up to Hayley and her band to come up with a creative plan to keep their school rocking.
