Extension ladders . The right ladder is particularly useful if you need to do work on your house. Go for a high, 6 or even 7 tread ladders, to reach the edge of your roof. It needn't be difficult with the right ladder - if you have a two-story house an extension ladder will help get up there and a telescopic ladder will tidy away compactly ...

### **Ladders and step stools | Argos**

The advantage of a three section extension ladder is that the closed height would be smaller than the two-section version needed to achieve the same height. The advantage of the two-section extension is that you would only need to extend it once compared to twice for the three-section, making it simpler to operate. Sort by Page 1 of 1 3

### **Ladders & Steps | Extension Ladders & Step Stools**

Rungs: You climb an extension ladder stepping on rungs instead of steps. They serve the same function, but rungs on a step ladder are half as deep so that the fly section can slide up and down. Base Section: The base section is static; it doesn't go up and down. It interlocks with the fly section so that the two sections operate on a rail-type system.
