As organizations come to understand the connection between best practices and LL, they should develop systems that support a transfer of knowledge. Berke (2001) considers LL and best practices as an integral process and defines it as Best Practices Lessons Learned (BPLL).

~~Lessons Learned~~

Lessons learned are the last outcome of a project. As we have explored in our previous articles, every project has a life cycle which includes four major phases. These are starting, organizing and preparing, execution and closing. Lessons learned are executed after the closing of the project.

~~Lessons Learned: Secret Code of Project Management~~

Lessons Learned Knowledge Management (LLKM) is defined as the recording of experience-based lessons-learned analyses such that individuals can discover, retrieve, and apply lessons appropriate to their current circumstances. Lessons-learned analysis includes retrospective analysis of successes and failures, counterfactual analysis of alternative actions and likely consequences, and hypothetical analysis to recommend actions in similar circumstances.

~~Lessons Learned Knowledge Management~~

Knowledge management is the conscious process of defining, structuring, retaining and sharing the knowledge and experience of employees within an organization. The main goal of knowledge management is to improve an organization's efficiency and save knowledge within the company.
