~~This book introduces students to the essential questions of the law of armed conflict and international humanitarian law.~~

~~"The Law of Armed Conflict: International Humanitarian Law in War introduces law students, undergraduates, and other interested readers, to the law of war in an age of terrorism. What law of armed conflict (LOAC), or its civilian analog, international humanitarian law (IHL), applies in a particular armed conflict? Are terrorist groups legally bound by that law? What constitutes a war crime? Who is a lawful target in a conflict involving nonstate terrorist groups? What are "rules of engagement" and who formulates them? Are nuclear weapons contrary to the law of war? What are "gray zone" conflicts? How are targeting decisions made? How can an autonomous weapon system be bound by law of armed conflict? Has anyone been convicted at Guant á namo and why have US military commissions failed? This textbook takes students and other interested readers through these law of armed conflict questions, and more, explaining each of them in nontechnical terms, with real-world examples and legal opinions from the United States, the United Kingdom, Germany, Yugoslavia and other jurisdictions. From the nineteenth century to today, from courts-martial to the US Supreme Court, from Nuremberg to 9/11, today's law of war is clearly explained, interpreted, and applied, in nontechnical terms"--~~

~~This book provides a modern and basic introduction to a branch of international law constantly gaining in importance in international life, namely international humanitarian law (the law of armed conflict). It is constructed in a way suitable for self-study. The subject-matters are discussed in self-contained chapters, allowing each to be studied independently of the others. Among the subject-matters discussed are, inter alia: the Relationship between jus ad bellum / jus in bello; Historical Evolution of IHL; Basic Principles and Sources of IHL; Martens Clause; International and Non-International Armed Conflicts; Material, Spatial, Personal and Temporal Scope of Application of IHL; Special Agreements under IHL; Role of the ICRC; Targeting; Objects Specifically Protected against Attack; Prohibited Weapons; Perfidy; Reprisals; Assistance of the Wounded and Sick; Definition of Combatants; Protection of Prisoners of War; Protection of Civilians; Occupied Territories; Protective Emblems; Sea Warfare; Neutrality; Implementation of IHL.~~

Experienced authors with over 45 years combined teaching and working in the field use fundamental principles and sources to instruct and guide discussion about the application of the law of armed conflict to contemporary and future questions. Students can gain a solid foundation in the law and develop the tools they need to analyze complex legal problems. International Law and Armed Conflict shows how the law informs operational and policy decision-making. Placing the law of armed conflict in context with related fields, such as human rights law and national security law, the text provides a complete framework for understanding legal paradigms during and after conflict. Innovative materials allow flexibility across a range of class scenarios, from a stand-alone course to part of a broader survey class. New to the Second Edition: New technologies and the law of armed conflict, including cyber, unmanned aerial vehicles and autonomous weapons systems The conflict in Syria, including ISIS, genocide and chemical weapons attacks Humanitarian assistance and the challenges of protecting the civilian population in urban conflicts Contemporary debates regarding detention in non-international armed conflict, human rights law, and targeted killing Professors and students will benefit from: Experienced authors with over 45 years combined teaching and working in the law of armed conflict field in the military, at think tanks, and in academia Use of the fundamental principles and sources of the law to inform discussions and questions about contemporary and future questions An approach that gives students a solid foundation in the law and the analytical tools they need to analyze complex legal situations and problems and to understand how the law informs and impacts operational and policy decision-making Context that ties together the law of armed conflict with other related fields, such as human rights law and national security law, to provide a complete framework for understanding the legal paradigm applicable during and after conflict Teaching materials include: Substantive and innovative tools and materials to teach this topic as a stand-alone class or as part of a broader class on a range of related topics A Teacher ' s manual with additional sources, discussion points, and key background information, all designed for maximum use and flexibility in a range of class scenarios

International humanitarian law is the law that governs the conduct of participants during armed conflict. This branch of law aims to regulate the means and methods of warfare as well as to provide protections to those who do not, or who no longer, take part in the hostilities. It is one of the oldest branches of international law and one of enduring relevance today. The Oxford Guide to International Humanitarian Law provides a practical yet sophisticated overview of this important area of law. Written by a stellar line up of contributors, drawn from those who not only have extensive practical experience but who are also regarded as leading scholars of the subject, the text offers a comprehensive and authoritative exposition of the field. The Guide provides professionals and advanced students with information and analysis of sufficient depth to enable them to perform their tasks with understanding and confidence. Each chapter illuminates how the law applies in practice, but does not shy away from the important conceptual issues that underpin how the law has developed. It will serve as a first port of call and a regular reference work for those interested in international humanitarian law.

Written by a team of distinguished and internationally renowned experts, this Oxford Handbook gives an analytical overview of international law as it applies in armed conflicts. The Handbook draws on international humanitarian law, human rights law, and the law of neutrality to provide a comprehensive picture of the status of law in war.

The Law of Armed Conflict provides a complete operational scenario and introduction to the operational organization of United States forces. The focus remains on United States law perspective, balanced with exposure to areas where the interpretation of its allied forces diverge. Jus ad bellum and jus in bello issues are addressed at length. The casebook comes to students with stunning authority. All of the authors are active or retired United States Army officers with more than 140 years of collective military operational experience among them. Several have experience in both legal and operational assignments as well. They deliver a comprehensive coverage of all aspects of the law of armed conflict, explaining the difference between law and policy in regulation of military operations.

Brings together three diverse perspectives on the law relating to armed conflict.

For policymakers, this book explains the ramifications under international humanitarian law of a major new field of weapon development with a focus on questions currently being debated by governments, the United Nations and other bodies. Based on a clear explanation of the principles of autonomous systems and a survey of technologies under active development as well as some that are in use today, it provides a thorough legal analysis grounded on a clear understanding of the technological realities of autonomous weapon systems. For legal practitioners and scholars, it describes the legal constraints that will apply to use of autonomous systems in armed conflict and the measures that will be needed to ensure that the efficacy of the law is maintained. More generally, it serves as a case study in identifying the legal consequences of use of autonomous systems in partnership with, or in place of, human beings.
