Aristotle's zoological writings with their wealth of detailed investigations on diverse species of animals have fascinated medieval and Renaissance culture. This volume explores how these texts have been read in various traditions (Arabic, Hebrew, Latin), and how they have been incorporated in different genres (in philosophical and scientific treatises, in florilegia and encyclopedias, in theological symbolism, in moral allegories, and in manuscript illustrations). This multidisciplinary and multilingual approach highlights substantial aspects of Aristotle's animals.

The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics. The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

This coherent presentation of clinical judgement, caring practices and collaborative practice provides ideas and images that readers can draw upon in their interactions with others and in their interpretation of what nurses do. It includes many clear, colorful examples and describes the five stages of skill acquisition, the nature of clinical judgement and experiential learning and the seven major domains of nursing practice. The narrative method captures content and contextual issues that are often missed by formal models of nursing knowledge. KEY TOPICS: The book uncovers the knowledge embedded in clinical nursing practice and provides the Dreyfus model of skill acquisition applied to nursing, an interpretive approach to identifying and describing clinical knowledge, nursing functions, effective management, research and clinical practice, career development and education, plus practical applications. MARKET: For nurses and healthcare professionals.

Surgical site infections are caused by bacteria that get in through incisions made during surgery. They threaten the lives of millions of patients each year and contribute to the spread of antibiotic resistance. In low- and middle-income countries, 11% of patients who undergo surgery are infected in the process. In Africa, up to 20% of women who have a caesarean section contract a wound infection, compromising their own health and their ability to care for their babies. But surgical site infections are not just a problem for poor countries. In the United States, they contribute to patients spending more than 400 000 extra days in hospital at a cost of an additional US \$10 billion per year. No international evidence-based guidelines had previously been available before WHO launched its global guidelines on the prevention of surgical site infection on 3 November 2016, and there are inconsistencies in the interpretation of evidence and recommendations in existing national guidelines. These new WHO guidelines are valid for any country and suitable to local adaptations, and take account of the strength of available scientific evidence, the cost and resource implications, and patient values and preferences.

Going Public investigates why companies routinely underprice themselves as they try to list themselves on the stock exchange. They subsequently underperform over the long-term and, in Going Public, the authors explore these 2 phenomena in plain English.

"Knowledge Of the Higher Worlds And Its Attainment" was originally published in 1938. This inspiring book by Rudolf Steiner offers a wealth of knowledge on the path of esoteric initiation. Included is much information on the higher body, higher planes of existence, and the spiritual encounter with the 'Guardians of the Threshold, as well as basic information on the mystical belief system. This book would be an excellent addition to the bookshelf of anyone with an interest in the subject. Contents Include : How is Knowledge of the Higher World Attained?; The Stages of Initiation; Some Practical Aspects; The Conditions of Esoteric Training; Some Results of Initiation; The Transformation of Dream Life; The Continuity of Consciousness; The Partition of Human Personality During Spiritual Training; The Guardian of the Threshold; The Great or Second Guardian of the Threshold. Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

Nutrition Assessment will address the techniques used in an in-depth evaluation of the data related to an individual's food and nutrient intake, lifestyle, and medical history. Emphasis will be placed on evidence-based components of nutrition assessment, including dietary intake, measurement of the human body (anthropometry) and biochemical assessment. The text will address the role of nutrition assessment as part of the Nutrition Care Process and will introduce readers to advancements in technology for measuring various inputs and outcomes related to effective nutrition assessment.

From conceptual and programmatic underpinnings to lived experiences of faculty, students, nurse executives, and bedside nurses, Transforming Nursing Through Knowledge leaves no stone unturned, allowing readers to gain a full understanding of a nurse's role in developing, using, and evaluating the impact of knowledge tools in healthcare. Authors Doris Grinspun and Irmajean Bajnok designed this text to be a practical, go-to book for healthcare organizations, nurse executives, and professionals learning to create world-class evidence-based cultures—how to get started, move forward, and achieve results. This book will help readers: \* Understand the Registered Nurses' Association of Ontario (RNAO) Best Practice Guidelines (BPG) Program and its galvanizing power as a global movement that builds collective identity \* Discover the latest in guideline development, implementation science, and evaluation at scale \* Tackle healthy work environment challenges using BPGs to influence outcomes for health professionals, patients, organizations, and health systems \* Use implementation science and social movement strategies to successfully implement BPGs in academic and service settings \* Recognize that transferring and sustaining evidence uptake require active and multilevel interventions \* Learn to integrate technology, including nursing order sets, to support evidence-based clinical decision making \* Propel

large-scale organizational and health system change using diffusion theory and social movement thinking \* Be inspired by nursing associations taking political leadership to secure the highest-quality health system for the public.
