3) Install the exe you've just made which is located in Platform\Win32\CreateRedist\FinalXX\OPENNI-WinXX-1.X.X.X.exe (XX being the number of bits: 32 or 64) The installer will also create the necessary environment variables (OPEN_NI_xxx), add the DLLs to the system path and register the internal modules with NiReg.

~~GitHub - OpenNI/OpenNI: OpenNI~~

OpenNI is an open-source framework for "natural interaction" - using your hands and body to interact with your digital devices. See OpenNI.org for more information about OpenNI. Most ROS users will not need to use OpenNI directly. openni_camera already implements a fully-featured ROS camera driver on top of OpenNI.

~~openni - ROS Wiki~~

The OpenNI library provides a general framework for working with various depth cameras using the following classes: OpenNI is used for initialization of work with the library. It provides information about errors, version of the library, devices found. Device is a connected device.

The OpenNI organization is an industry-led, not-for-profit organization formed to certify and promote the compatibility and interoperability of Natural Interaction (NI) devices, applications and middleware.

~~OpenNI on your PC | Kinect Hacks~~

OpenNI (Open Natural Interaction) is an open source Framework (under LGPL), partially developed by PrimeSence which is one of the creators of the Kinect. It provides standard abstract programming interfaces (API) (in C++ and C #) which allow developers to write applications based on natural interactions.

~~Kinect: How to install and use OpenNI on Windows - Part 1 ...~~

OpenKinect is an open community of people interested in making use of the amazing Xbox Kinect hardware with our PCs and other devices. We are working on free, open source libraries that will enable the Kinect to be used with Windows, Linux, and Mac.
