Mitford ' s classic expos é The American Way of Death comes this meticulously researched, refreshingly irreverent, and lavishly illustrated look at death from acclaimed author Harold Schechter. With his trademark fearlessness and bracing sense of humor, Schechter digs deep into a wealth of sources to unearth a treasure trove of surprising facts, amusing anecdotes, practical information, and timeless wisdom about that undiscovered country to which we will all one day travel. Topics include • Death anxiety – is your fear of death normal or off the scale? • You can ' t take it with you . . . or can you? Wacky wills and bizarre bequests • The hospice experience – going out in comfort and style • Deathbed and funeral etiquette – how to help the dying and mourn the dead with dignity • Death on demand – why the right-to-die movement may be the next big thing • “ Good-bye everybody ” – famous last words • The embalmer ' s art – all

dressed up and nowhere to go • Behind the scenes at your local funeral home • Alternative burial choices – from coral reefs to outer space From the cold, hard facts of death to lessons in the art of dying well, from what happens in the body ' s last living moments to what transpires in the ground or in the furnace, from near-death experiences to speculation on the afterlife, *The Whole Death Catalog* leaves no gravestone unturned.

To celebrate the 50th anniversary of *Howl and Other Poems*, with nearly one million copies in print, City Lights presents the story of editing, publishing and defending Allen Ginsberg ' s landmark poem within a broader context of obscenity issues and censorship of literary

works. This collection begins with an introduction by publisher Lawrence Ferlinghetti, who shares his memories of hearing Howl first read at the 6 Gallery, of his arrest and of the subsequent legal defense of Howl ' s publication. Never-before-published correspondence of Ginsberg, Ferlinghetti, Kerouac, Gregory Corso, John Hollander, Richard Eberhart and others provides an in-depth commentary on the poem ' s ethical intent and its social significance to the author and his contemporaries. A section on the public reaction to the trial includes newspaper reportage, op-ed pieces by Ginsberg and Ferlinghetti and letters to the editor from the public, which provide fascinating background material on the cultural climate of the mid-1950s. A timeline of literary censorship in the United States places this battle for free expression in a historical context. Also included are photographs, transcripts of relevant trial testimony, Judge Clayton Horn ' s decision

and its ramifications and a long essay by Albert Bendich, the ACLU attorney who defended Howl on constitutional grounds. Editor Bill Morgan discusses more recent challenges to Howl in the late 1980s and how the fight against censorship continues today in new guises.

This is the resource that engineers turn to in the study of radiation detection. The fourth edition takes into account the technical developments that continue to enhance the instruments and techniques available for the detection and spectroscopy of ionizing radiation. New coverage is presented on ROC curves, micropattern gas detectors, new sensors for scintillation light, and the excess noise factor. Revised discussions are also included on TLDs and cryogenic spectrometers, radiation backgrounds, and the VME standard. Engineers will gain a strong understanding of the field with this

updated book.

"Solveig Hisdal is not only aware of the knowledge housed in Norway's museums, she has also learned how to use it. She has visited museums throughout the country, searching eagerly for the treasures that her ancestors left behind. She has found textiles, chests, cabinets and old folk costumes that have later become her greatest source of inspiration. This book is a result of her quest, and it shows how the creativity of the past has inspired her to make beautiful knitted designs. It contains wonderful knitting ideas for almost all occasions, from a child's christening outfit to an exquisite, knitted bridal cardigan with beads and silk. Whether you wish to be inspired by the beautiful pictures, or knit some of the outfits -- enjoy the book!" --P. [4] of cover.

Selections from each of John Muir's published books.

In the future world of Scorch, America is run by a “ corporacracy. ” Three conglomerates have taken control not by force but by manipulating common beliefs and values through the media, and particularly by playing on Americans ’ fears of Big Brother. Consumerism and privatization have run amok in this landscape of flashing screens and subtle brainwashing, a world where even city streets and public schools are run by big business. This is a darkly comic first novel of a dystopian future, with echoes of 1984 and Brave New World.

This book constitutes the refereed proceedings of the 16th International Conference on Virtual Reality and Augmented Reality,

EuroVR 2019, held in Tallinn, Estonia, in October 2019. The 11 full papers and 5 short papers presented together with 8 scientific posters were carefully reviewed and selected from 54 submissions. The papers are organized in topical sections named: Immersive Interaction; Training, Teaching and Learning; Industrial Applications and Data Analysis; Perception, Cognition and Evaluation; and Scientific Posters.

"As novelist and poet Andrei Codrescu points out in the essay that accompanies this selection of photographs from the Getty Museum's collection, Evans's photographs are the work of an artist whose temperament was distinctly at odds with Beals's impassioned rhetoric. Evans's photographs of Cuba were made by a young, still maturing

artist who - as Codrescu argues - was just beginning to combine his early, formalist aesthetic with the social concerns that would figure prominently in his later work." --Jacket.
