Software Engineering: Principles and Practice

Software maintenance in software engineering is the modification of a software product after delivery to correct faults, to improve performance or other attributes. A common perception of maintenance is that it merely involves fixing defects. However, one study indicated that over 80% of maintenance effort is used for non-corrective actions. This perception is perpetuated by users submitting problem reports that in reality are functionality enhancements to the system. More recent studies put the

9789812384263 - Software Maintenance: Concepts and ...

Software maintenance is recognised as a key area in software engineering [9, 163]. Despite this, many mainstream software engineering courses are biased towards the development of new software systems at the expense of issues surrounding changes to these systems after they become operational [70]. Our intention is to produce a text that presents:

Software Maintenance Concepts And Practice

Software Maintenance is the process of modifying a software product after it has been delivered to the customer. The main purpose of software maintenance is to modify and update software application after delivery to correct faults and to improve performance. Need for Maintenance – Software Maintenance must be performed in order to: Correct faults.

Software Engineering | Software Maintenance - GeeksforGeeks

66 Software Maintenance: Concepts and Practice 5.4.1 Code-and-Fix Model Figure 5.6 The code-and-fix model This is ad hoc and not well defined. It is a simple two-phase model (Figure 5.6). The first phase is to write code. The next phase is to 'fix' it. Fixing in this context may be error correction or addition of further functionality.
