research available in this field—from competitive strategy and industry analysis to environmental trends and ethics. Integration of international issues throughout provides an essential understanding of global economics and its impact on business activities in any location. Chapter topics explore basic concepts in strategic management; corporate governance and social responsibility; environmental scanning and industry analysis; internal scanning and organizational analysis; strategy formulation; strategy implementation; evaluation and control; and strategic issues in managing technology and innovation, entrepreneurial ventures, small businesses, and not-for-profit organizations. For Strategic Planners and Chief Executive Officers.

Most business schools use case studies in their courses. However, these are typically based on past cases and assigned to students to solve. This book describes a new approach for teaching with case studies, which was developed and applied successfully at TUM School of Management. In this approach, student teams write and solve their own case study on a topic concerning current and future businesses. A case can thus be on their own startup or a strategic decision of existing companies. During the course, the students receive intensive coaching while selecting and developing the case topic by the course advisors as well as feedback by industry experts and executives for whom the case is actually a burning question. The authors present 17 cases covering strategic questions for startups and technology companies such as Deutsche Post, BMW, Ryanair, Lufthansa, Stadtwerke München, Fielmann, adidas, Siemens, Caribou Biosciences, eon, Airbus, Unicredit and UBS.

James E. Austin's case studies are designed to help managers effectively compete in the Third World business environment. Designed for business school courses and in-house company training programs, this companion to *Managing in Developing Countries* presents 35 case studies organized around Professor Austin's Environmental Analysis Framework, a powerful, field-tested tool designed to help managers examine, prepare for and compete in the Third World business environment. Through comprehensive and thoroughly tested classroom-tested cases, Austin systematically examines the economic, political, and cultural factors of each country at international, national, industry, and company levels. The cases also reveal the critical strategic issues and operating problems that managers will encounter in developing countries—in governmental relations, finance, marketing, production, and organization.

This book shows how strategic management can be practiced in the context of flexibility. It discusses strategic formulation and implementation perspectives and practices, including vision and mission, general environment analysis, industry analysis, competitive advantage, resource and capability view, generic strategies, business level strategy, corporate level strategy, international strategy, change and turnaround, strategic implementation, and strategic controls, as well as flexibility embedded in these concepts. It can be used as a primary textbook for managerial programs for executives, and as a supplementary case textbook for core MBA courses. Exploring "Strategic Formulation" and "Strategic Implementation" concepts from a flexibility perspective, it is also an excellent companion to leading strategic management textbooks.

Case Studies in Strategic Planning shows you how to do systematic strategic planning in real-life cases, regardless of your level of expertise. The simplified version of this methodology and its analysis tools, based on fundamentals, are easily understood and universally applied to any type of business for developing strategic plans. More important

When facing a difficult management challenge, wouldn't it be great if you could turn to a panel of experts to help guide you to the right decision? Now you can, with books from the Judgment Calls series. Drawn from the pages of Harvard Business Review, these interactive, solutions-oriented guides allow readers to access the wisdom of leading experts as they tackle familiar and perplexing business situations. These engagingly written books will help managers improve problem-solving skills and make better judgment calls under fire. A preface provides an overview and sets the context for using these provocative case studies as learning tools in corporate classrooms. A relevant chapter from an HBE volume introduces the topic as a refresher course. Finally, an appendix of resources such as executive summaries, guiding questions, and a list of further reading rounds out the book. Judgment Calls provide insight into a variety of real world difficulties and offer solutions that managers will find both sound and practical. Our ideal reader is the business traveler who's thinking about this very issue, sees the book in the airport, and throws it in his or her briefcase to read on the plane. This volume, tentatively titled "Growing for Broke and Other Stories From the Frontlines of Management" looks at growth strategy. How do you grow your business without sending it flying off the rails? When should you stick to your core? All this and more!

With a view to continue the current growth momentum, excel in all phases of business, and create future leadership in Asia and across the globe, there is a felt need to develop a deep understanding of the Asian business environment, and how to create effective marketing strategies that will help growing their businesses.

Strategic Business Analysis shows students how to carry out a strategic analysis of a business, with clear guidelines on where and how to apply the core strategic techniques and models that are the integral tools of strategic management. The authors identify the key questions in strategic analysis and provide an understandable framework for answering these questions. Several case studies are used to focus understanding and enable a more thorough analysis of the concepts and issues, especially useful for students involved with case study analysis. Accompanying the text is a CD-Rom containing the models, tutorial guidance, and a PowerPoint presentation. A blank template is provided for each model, enabling students to actively interact and enter their own data - an effective 'what if...' facility. This will enable students to appreciate the limitations as well as the advantages of the strategic models.
