Seeing is Understanding. The first VISUAL guide to marine diesel systems on recreational boats. Step-by-step instructions in clear, simple drawings explain how to maintain, winterize and recommission all parts of the system - fuel deck fill - engine - batteries - transmission - stern gland - propeller. Book one of a new series. Canadian author is a sailor and marine mechanic cruising aboard his 36-foot steel-hulled Chevrier sloop. Illustrations: 300+ drawings Pages: 222 pages Published: 2017 Format: softcover Category: Inboards, Gas & Diesel

Work-around solutions and emergency repairs that will get your boat home when all else fails Practical Boat Mechanics belongs onboard every boat that has a gasoline, diesel, inboard, or out-board engine. This practical collection of fast fixes enables you to repair failed machinery with basic tools under adverse conditions. Designed and written for non-mechanics, it also presents do-it-yourself maintenance procedures and schedules that will prevent most problems from occurring.

This densely illustrated, hands-on guide to diesel engine maintenance, troubleshooting, and repair renders its subject more user-friendly than ever before. Finally, boatowners who grew up with gas engines can set aside their fears about tinkering with diesels, which are safer and increasingly more prevalent. As in other volumes in the International Marine Sailboat Library, every step of every procedure is illustrated, so that users can work from the illustrations alone. The troubleshooting charts in the second chapter--probably the most comprehensive ever published--are followed by system-specific chapters, allowing readers to quickly diagnose problems, then turn to the chapter with solutions. Diesel engine systems covered include: mechanical; oil; fresh- and raw-water cooling; low- and high-pressure fuel; exhaust; starting; charging; transmission and stern gear.

Lull that curious baby to sleep with the promise of more adventure on the morrow. This ebook features lyrical text that follows George as he dreams his way to a new day and lots of curious exploration—on an imaginary hot air balloon ride, through pillow play adventures, and a bathtime sea trip.

Steam Generation from Biomass: Construction and Design of Large Boilers provides in-depth coverage of steam generator engineering for biomass combustion. It presents the design process and the necessary information needed for an understanding of not only the function of different components of a steam generator, but also what design choices have been made. Professor Vakkilainen explores each particular aspect of steam generator design from the point-of-view of pressure part design, mechanical design, layout design, process design, performance optimization, and cost optimization. Topics such as fuels and their emissions, steam-water circulation, auxiliary equipment, availability and reliability, measurements and control, manufacture, erection, and inspection are covered. Special attention is given to recovery boilers and fluidized bed boilers, and automated design and dimensioning calculation spreadsheets are available for download at the book 's companion website. This book is intended for both design engineers and steam boiler operators, as well as those involved in plant management and equipment purchasing. Provides a complete overview of biomass steam boilers, including processes, phenomena, and nomenclature Presents a clear view of how biomass boilers differ from fossil fuel boilers Covers the most used types of large-scale biomass boilers, including recovery boilers, fluidized bed boilers, and auxiliary equipment Includes a companion website with spreadsheets, calculation examples, and

automatic calculation tools for design and dimensioning

Up-and-coming celeb manager Sage Collins is ready for the big time. About to land her first big client—a teenager who could be the next Michael Jordan—Sage is determined to make her mark. The immovable object in her way? Marshall Grant, the athlete's father and manager—over six feet of sexy, take-charge ex-military male. No matter. Big-city chick Sage isn't leaving small-town Indiana without a contract—even if she has to seduce Marshall to get it. Sage is all wrong for Marshall. So why is the single father finding the Vegas glam girl so irresistible? Marshall never thought Sage would trade her stilettos for sweats and sneakers, or her thrill-a-minute life for the frigid temps of Indiana. (Maybe the romantic firelit dinner or midnight sleigh rides have something to do with it.) Is the ultimate city girl playing a game neither of them can win? Or are they about to become partners in a new game, where love calls the shots?
