Trading Triads explains the 'Triads' method, a system that enables simple market analysis, flagging accurate turning points as well as precise entry and exit points for trades. The book begins by introducing the reader to the Triads method and how it was developed, as well as explaining how it reflects the fundamental structure of the market. The author goes on to explain the oscillatory nature of markets, their structure and their key elements. The book explains why most indicators give false signals and explains how to avoid them. After exploring fundamental market structure, the book explains the Triads strategy. It covers precise entry and exit points as well as stop placement. Also it explains how to use Triads at the same time as other indicators to trade the markets most successfully - for example, how a simple moving average traded with the help of Triads becomes a powerful trading tool that avoids most false signals. It also shows how to trade an MACD, stochastic or any other indicator/method with the help of Triads. The purpose of these examples is to show how the Triads methodology improves significantly any trading method or trading tool. The book aims to explain to the reader a new trading method which can simplify analysis of the market, and provide a simple and extremely versatile strategy which can sit alongside the trader's current range of tools to increase precision, and results, in their trading of the markets.

"Wonderful . . . a rousing dramatization of history's greatest sea battle." ~James D. Hornfischer, author of The Last Stand of the Tin Can Sailors "I shall return" is General Douglas MacArthur's promise to the Filipinos. It will take 165,000 troops and 700 ships in the bloody battle of Leyte Gulf to do it. Among them is the destroyer USS Matthew and her skipper, Commander Mike Donovan, a veteran haunted by earlier savage battles. What Donovan doesn't know is that Vice Admiral Takao Kurita of Japan has laid an ingenious trap as the Matthew heads for the treacherous waters of Leyte Gulf. But Donovan faces something even deadlier than Kurita's battleships: Explosives secretly slipped on board American ships by saboteurs are set to detonate at any time. Now the Matthew's survival hinges on the ability of Donovan and his men to dismantle a bomb in the midst of the panic and the chaos of history's greatest naval battle. "Gobbell's sea tales . . . will have you looking up your nearest Navy recruiter." ~W.E.B. Griffin "[John Gobbell is] a first-rate storyteller." ~Stephen Coonts From the Paperback edition.

He argues that "no matter how different any two cultures may appear to be on the surface, they are still created by human beings, and as such have deep similarities." Nitobe believed that connecting Bushido with greater teachings could make an important contribution to all humanity, that the way of the samurai is not something peculiarly Japanese, but of value to the entire human race.
