In fashioning America's nuclear strategy vis-à-vis nuclear and  
not-yet-nuclear adversaries, [iii] US military planners must  
include a mechanism to determine whether a pertinent  
adversary (e.g., North Korea or Iran) will more likely be  
rational or irrational. Operationally, this means ascertaining  
whether the identifiably relevant foe will value its collective  
survival (either as a state, or as an organized terror group)  
more highly than any other preference or combination of  
preferences.

The Future of U.S. Nuclear Policy: The Case for No First ...  
The United States was the first country to manufacture nuclear weapons and is the only country to have used them in combat, with the separate bombings of Hiroshima and Nagasaki in World War II. Before and during the Cold War, it conducted over one thousand nuclear tests and tested many long-range nuclear weapons delivery systems.

Nuclear weapons of the United States - Wikipedia  
U.S. Nuclear Policy at an Inflection Point by Eric Gomez Eric Gomez argues that U.S. nuclear strategy is due for a reconsideration. As the U.S. stockpile of nuclear weapons undergoes modernization—a process that will take more than a decade—the time is right for rethinking what we should be doing with them.

The United States Must Avoid a Nuclear Arms Race with ...  
By abandoning the deal, the United States has jeopardized the entire multinational deal and more importantly the stability of the nuclear community by withdrawing from the only deal that stood in the way of Iran obtaining nuclear weapons. Since the United States ' withdrawal from the deal, Iran is preparing to increase its uranium enrichment capacity significantly above what is allowed by the 2015 deal that used to be in place. The little justification the United States provided for pulling ...
