Modes Canary has three modes: away (shield), home (house), and night (moon). In away mode, Canary monitors your home for activity and sends you a push notification with a video when it detects movement. In home mode, Canary can send you notifications when it detects activity, record activity without notifications, or you

Register a Canary account by completing the Sign up process on my.canary.is. Android. Open the Canary app and tap Get Started. Type your email address and password in the corresponding fields. Tap Next when you're finished. Follow the onscreen instructions. After creating your account, a series of onscreen prompts will guide you through the setup process.

How do I set up my Canary? - Canary Help Center

Welcome to the OpenCanary guide. OpenCanary is a daemon that runs canary services, which trigger alerts when (ab)used. The alerts can be sent to a variety of sources, including syslog, emails and a companion daemon opencanary-correlator. The Correlator coalesces multiple related events (eg. individual brute-force login attempts) into a single alert sent via email or SMS.
