Mr French is an invaluable resource – the planning, presentations, tips and games are of a very high standard, which the children really enjoy. Each set of lessons are interesting, fun and engage the children well. It is absolutely possible to teach directly from the plans.

The third edition of *Vis-à-vis* continues the excitement of the innovative second edition with a fully integrated and revised multimedia package and updated cultural information presented in the “Correspondance” feature (chapter opening letter, postcard, or e-mail, which is answered in the mid-lesson “Correspondance” cultural spread) and in the new “Bienvenue dans le monde francophone” feature that recurs after every four chapters in the text. The overall goal of the revision remains the same as that of the second edition: to promote a balanced four-skills approach to learning French through a wide variety of listening, speaking, reading, and writing activities, while introducing students to the richness and diversity of the Francophone world.

*Vis-à-vis* engages students with its unique integration of contemporary culture and communicative building blocks, providing the tools they need to build a solid foundation in introductory French. The proven qualities of *Vis-à-vis* are well known: • an easy-to-navigate chapter structure with four lessons in which vocabulary, grammar, and culture work together as integrated units; • an abundance of practice activities that range from form-focused to communicative; • a balanced approach to the four skills; • diverse coverage of the Francophone world that includes an outstanding video program featuring bloggers and cultural footage from eight different Francophone regions. These features support the core goals of the introductory French course—communicative and cultural competence—and lay the groundwork for student success. “Connect French” and “LearnSmart” In its sixth edition, *Vis-à-vis*, continues to evolve to meet the changing needs of instructors and students by responding to feedback from these users themselves. Employing a wide array of research tools, we identified a number of areas for potential innovation. The new program builds upon the success of the fifth edition with an expanded emphasis on contemporary language, pronunciation, culture, and technology to create a truly communicative, interactive experience. On the digital side, this new edition offers Connect French and LearnSmart, with their unparalleled adaptive and digital learning resources. These powerful tools, now an integral part of the sixth edition, complement and support the goals of the *Vis-à-vis* program and address the needs of the evolving introductory French course. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. \*Connect French, including but not limited to the workbook/lab manual, LearnSmart, the video program, and chat tools, is sold separately and does not come automatically with the purchase of the textbook.

*Vis-à-vis* engages students with its unique integration of contemporary culture and communicative building blocks, providing tools to build a solid foundation in introductory French. Building communicative competence with *Vis-à-vis* One of the major challenges of the introductory language course is to give each student ample exposure to the language and sufficient opportunity to practice speaking, both in and out of the classroom. To parallel print versions of the text and Workbook/Laboratory Manual, we offer the same content on the Connect platform, where students have full access to the eBook, online Workbook/Laboratory Manual activities, LearnSmart, and all accompanying audio and video resources. In *Vis-à-vis*, the following resources work together to promote communicative competence: Interactive vocabulary presentations (Paroles) include audio recordings, allowing students to listen, record, and practice new vocabulary outside of class. Interactive activities for vocabulary and grammar, many of which are auto-graded, give students the opportunity to complete their assignments and come to class better prepared to participate in paired and group activities. Prononcez bien! activities include a recording feature and provide students with opportunities for discrete-word and contextualized practice that help students develop confidence in their speaking abilities. Recordings of lively mini-dialogues featuring the blog characters give students a spirited introduction to the new grammatical structure in context. Seventeen Grammaire interactive tutorials, each with a brief practice quiz, focus on structures that students typically struggle with, such as passé

compose vs. imparfait. LearnSmart modules for vocabulary and grammar are available specifically for Vis-à-vis. This powerful adaptive tool helps students pinpoint their weaknesses and gives them an individualized study program based on their results. Audio prompts for vocabulary and grammar help students strengthen both their listening and writing skills. With these powerful tools, students have many opportunities to build their communicative skills, and instructors save valuable class time for interactive practice. Building cultural competence with Vis-à-vis The program's meaningful and extensive exploration of the rich culture of France and the Francophone world is fully supported throughout the program. Each four-chapter segment of Vis-à-vis focuses on a new French or Francophone character and region. The personal online journal entries in Le blog de..., the related Reportage, and the Bienvenue... readings that precede Chapter 1 and follow Chapters 4, 8, 12, and 16, expose students to contemporary language and the vast diversity of life and culture in France, Canada, Tunisia, and beyond. Le videoblog de... and the stunning Bienvenue video segments feature the bloggers and give students a window into the sights and sounds of eight different French-speaking regions/countries including France, Martinique, and Tahiti. Each video is accompanied by comprehension and cross-cultural comparison activities that encourage students to make connections between their culture and those of the French-speaking world. A brand-new feature has been added below the Reportage, entitled Le Micro-trottoir. Le micro-trottoir provides students a chance to see everyday language in action through recorded "man-on-the-street" interviews featuring a diverse group of people. The interview questions are provided in the text and students will hear the interviewees respond to these questions in the video. Instructors can use these questions as a pre-viewing activity or have students ask and answer them after they watch the video. Additional activities based on the interviews are available in Connect. In the 7th edition, we also added a new feature entitled Sondages to all even-numbered chapters. Sondages are culture-based activities in which students look at statistics about French life and compare to their own lives. The results could serve as a basis for an end-of-semester cross-cultural comparison project.

Shares the author's experience as an American French major who relocated to France, married, and raised a family, in an account that shares numerous everyday French words and phrases that are unlikely to be taught in classrooms.

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Nous vous invitons à découvrir Rond-Point, deuxième édition! Based on the principles of task-based language teaching, students learn through collaboration and interaction. They develop their communicative skills from day one while working in the target language. Contexts are authentic and related to real-life; i.e. organizing a vacation, planning a party, and so on. Due in large part to its flexible organization, the program is being used successfully at a variety of colleges and universities around the world. This Second Edition is based on comments from instructors in Europe and in North America. The authors have retained the key elements that have made the first edition so successful: an abundance of authentic materials, fun and efficient smaller tasks leading students to the completion of a larger and more ambitious task at the end of each unit, recycling of the main grammar points throughout the book, a very dynamic approach where interactions and meaning negotiations among students is at the heart of each class.

abundance of practice activities, and diverse coverage of the Francophone world are the foundation for student success. The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site.
